

Biological Approach Essay Prompts

- 1) Discuss the use of brain imaging technologies in investigating the relationship between biological factors and behaviour.
- 2) Evaluate studies related to localization of function in the brain.
- 3) To what extent does neuroplasticity effect the brain and human behavior.
- 4) Using one or more examples, discuss effects of neurotransmission on human behavior.
- 5) Discuss neural networks and their effect on human behaviour.
- 6) Using one or more examples, discuss functions of two hormones in human behaviour.
- 7) To what extent do pheromones influence human behaviour.
- 8) Evaluate studies on genetic similarities.
- 9) Discuss two effects of the environment on genetic expression.
- 10) Evaluate one evolutionary explanation of behaviour.
- 11) Discuss ethical considerations in research into genetic influences on behaviour.
- 12) Discuss how and why particular research methods are used with the biological approach.
- 13) Discuss ethical considerations related to research studies with the biological approach.
